

Epilepsy Queensland NDIS Supports

NDIS registered provider

www.epilepsyqueensland.com.au

As the specialist epilepsy organisation in Queensland and an NDIS registered provider, we are best placed to provide the following services in cooperation and collaboration with the person living with epilepsy and, as relevant, their informal and paid service networks.

At a minimum, we recommend that all people with epilepsy have the following items within their plan.

A suitably qualified and experienced team member from Epilepsy Queensland can provide these services:

Capacity Building: Improved Daily Living (Therapy Supports)

- Epilepsy Needs Assessment - Assessment of the person's unique epilepsy related needs, particularly where the epilepsy is complex or unclear. This includes assessing the person's ability to self-manage at home or in the community and identify safety and risk management support needs – such as monitoring equipment etc.; (~5 hrs – depending on the complexity + travel)

An outcome of the Epilepsy Assessment above, may include recommendations for the purchase of specific aids or equipment. As some providers for this equipment may not be registered with the National Disability Insurance Agency (NDIA), the participant may need to consider this section of your plan being Self-managed or Plan Managed.

- Developing an Epilepsy Management Plan, +/- Midazolam Plan – documenting an individualized epilepsy management plan in an easy to understand format, that provides information on the type of seizures, how the seizures present, triggers for the seizures, and specific first aid and emergency management; (~3hrs – depending on complexity and availability of information + travel)
- Training for families/carers and support staff – this is essential for the person's support team - this provides necessary information for families, carers and support staff in relation to identifying and responding to the persons needs and the safe administration of prescribed medications (~2x sessions per year – to manage staff turn over, at 2.5hrs p/session)

For more information about how Epilepsy Queensland can assist a person with epilepsy, please contact us on 07 3435 5000 or ndis@epilepsyqueensland.com.au.
